F-15 STRIKE EAGLE™

F-15 Strike Eagle is MicroProse Games' revolutionary 3-D combat flight simulation of the world's most powerful fighter jet — the first arcade game to successfully combine authenticity, incredible action and high earnings. The game's many exciting features include:

- **Addicting Gameplay.** **F-15 Strike Eagle** cannot be mastered in moments, and abandoned a few quarters later. It constantly pushes the player to the limits of his abilities with a never-ending stream of split-second decision-making opportunities. A variety of playing options makes it easy for beginners to jump in the cockpit and start blasting, and for veterans to still have the challenge of a lifetime.
- **High, Consistent Earnings.** In a variety of locations, over the span of many months, **F-15 Strike Eagle** has earned big, and earned long. Many games boast of having "legs." **F-15 Strike Eagle** has the numbers to back it up. One location listed **F-15** as its number 1 stand-up for 21 straight weeks!
- **Multiple Buy-ins.** **F-15 Strike Eagle** lets players buy-in not only for additional playing time, but also for extra supplies and repairs. Experienced players often pay more than the minimum 50¢ right away, so that those extra credits may be used during the heat of battle.
- **Dazzling, Unprecedented Technology.** MicroProse Games' has designed a 3-D system so vivid and realistic it required its own customized hardware to run. Over 2,000 filled polygons are generated each frame; over 30 frames are generated each second (a frame rate higher than that of motion pictures). Such graphic detail means that not only is **F-15 Strike Eagle** fun to play, it's fun to watch. The game has routinely drawn crowds to locations on the power of its graphics alone.
